Rich Filters::PDF Reporting Sample – Dynamic filtering

Export date & time: 13/Apr/20 6:05 PM
Exported by: John Jackson

Rich filter (#51): Rich Filter::PDF Reports Demo
Jira filter (#10,900): All issues
Base JQL query: `project in (BC, GI, PE, EUSD, NASD, PSD) ORDER BY key`
Active dynamic filters:

- Project: Balanced Clustering (BC), Grid Implementation (GI), Platform Enhancement (PE)
- Issue Type: Bug, Improvement, Task
- Assignee: (NOT) Unassigned

Active smart filters:

- High Level Status: Backlog, WIP, Validation, Delivered

Issue count: 67 filtered issues (689 issues were hidden by the active quick filters out of 756 total issues)

Rich Filter::PDF Reports Demo / Rich Filter Results – Dynamic list of issues

High-Level Status	Issue Type	Key	Priority	Summary	Warnings	Assignee
DELIVERED	Task	BC-1	Medium	Ensure that the Product Identity is available and clearly defined		Amanda Brown
DELIVERED	Task	BC-2	Medium	Feasibility study and/or prototype		Amanda Brown
DELIVERED	Task	BC-3	High	Help the customer define their requirements in the form of Use cases		Chris Davies
VALIDATION	Improvement	BC-4	High	LDAP / Active Directory connections / Single Sign On	OVERDUE	Will Taylor
WIP	Task	BC-8	Medium	Make sure the 'last updated' attribute does not significantly impact the system performance	OVERDUE	John Jackson
BACKLOG	Bug	BC-12	Medium	The end-of-day report crashes if launched by certain users		George Walker
DELIVERED	Task	BC-18	Highest	Review of the internal architecture. Use as opportunity for knowledge transfer		John Smith
VALIDATION	Task	BC-19	Highest	Global Test Plan should be documented detailing test cases, expected and achieved results	DUE 1W	George Walker
BACKLOG	Improvement	BC-22	Medium	Improve the search experience: add UI for criteria selection		Julie Williams
BACKLOG	Improvement	BC-23	Low	Home dashboard should support templating		Julie Williams
BACKLOG	Improvement	BC-26	Medium	SPF - Exchange platform is a single point of failure for overnight processing		Julie Williams
BACKLOG	Bug	BC-28	High	Full text search service does not scale		Julie Williams
VALIDATION	Improvement	BC-30	Highest	Transaction engine is limiting platform throughput	DUE 1W	Chris Davies
BACKLOG	Bug	BC-31	Low	Single threaded model is limiting UI responsiveness		Chris Davies
BACKLOG	Bug	BC-34	Lowest	Font scaling is not applied correctly		John Smith
BACKLOG	Bug	BC-35	Lowest	Refresh command is not accessible for Customer role		John Smith
BACKLOG	Bug	BC-36	Lowest	Fix memory leak appearing when reseting framework api		John Smith
BACKLOG	Bug	BC-37	High	Copy-paste from application screen to excel is not working well for dates above 2015		John Smith
BACKLOG	Improvement	BC-40	Low	When defining a view, give the ability to rename the columns		Eric Jones
BACKLOG	Improvement	BC-41	Medium	Don't store data for items that don't contribute to any output in a report	DUE 1W	Eric Jones
BACKLOG	Bug	BC-42	Medium	Start button stays grey and unclickable when reaching Advanced mode		Eric Jones
BACKLOG	Bug	BC-44	Medium	'My tasks' Filter is not working in main gallery		Julie Williams
VALIDATION	Improvement	BC-46	Medium	Add drag&drop reorder in items admin page		John Jackson
BACKLOG	Bug	BC-49	Medium	Export to Excel with userdefined criteria does not work	OVERDUE	Will Taylor
BACKLOG	Task	BC-50	High	Scheduling of intermediate releases for customer testing and assessment		Chris Davies
DELIVERED	Task	GI-1	Highest	Design solution for grid load balancing		John Jackson
DELIVERED	Task	GI-4	High	Prepare grid for implementation		George Walker
DELIVERED	Bug	GI-11	Highest	Systems Manager SQL server jobs failing in specific configurations		Eric Jones

High-Level Status	Issue Type	Key	Priority	Summary	Warnings	Assignee
DELIVERED	Task	GI-13	Medium	Install production servers and prerequisite software		Amanda Brown
DELIVERED	Task	GI-14	Medium	Install console machines and check grid structure and integrity		George Walker
DELIVERED	Improvement	GI-15	Medium	Implement distributed data feeds in the production environment		George Walker
DELIVERED	Bug	GI-30	Medium	System configuration table does not reflect the request processor names and attributes		John Jackson
WIP	Task	GI-31	Medium	Create an efficient solution maintenance plan		John Jackson
DELIVERED	Task	GI-34	Medium	Establish relationship between system manager and change management		George Walker
DELIVERED	Bug	GI-38	Medium	Server configuration definition is not consistent with the allocated resources		Eric Jones
DELIVERED	Task	GI-40	Medium	Configure automatic filtering in test server configuration		Eric Jones
DELIVERED	Bug	GI-41	Highest	History server stops unexpectedly when scheduled jobs are finished		Eric Jones
WIP	Task	GI-42	High	Install event handler on console server		George Walker
VALIDATION	Task	GI-43	Medium	For each resource type, perform initial setup	OVERDUE	George Walker
DELIVERED	Bug	GI-44	Medium	Logins and profiles are not correctly configured at startup		Amanda Brown
DELIVERED	Task	GI-45	Medium	Verify connectivity from test and QA servers on production environment		Chris Davies
DELIVERED	Bug	GI-51	Medium	User profiles are not recognized if the server is on testing and simulation mode		Amanda Brown
DELIVERED	Bug	GI-55	High	History server is not scheduled correctly after restart		John Jackson
DELIVERED	Task	GI-56	High	History server needs to be reindexed		Eric Jones
DELIVERED	Bug	GI-57	Medium	The addition and deletion of user IDs does not work correctly		George Walker
DELIVERED	Improvement	GI-58	High	Batch schedule for download/upload process should be triggered automatically		Chris Davies
BACKLOG	Task	GI-59	Medium	Each business system should be reconfigured to comply with the new standards		George Walker
DELIVERED	Improvement	GI-63	Medium	Filtering should be disabled for admin sessions		John Smith
DELIVERED	Task	GI-65	Medium	Order console machines and prerequisite software for 3rd party integrations		Amanda Brown
DELIVERED	Task	GI-66	Medium	Define the server configuration for initial config		Amanda Brown
DELIVERED	Improvement	GI-67	Highest	Server configuration should be exportable from the admin console		Eric Jones
DELIVERED	Improvement	GI-68	Medium	Systems discovery should be triggered automatically after a planned restart		John Jackson
BACKLOG	Improvement	GI-71	Low	System manager health monitor to be extensible to 3rd party systems		Amanda Brown
BACKLOG	Improvement	GI-72	Low	Event sources should to be logged if required from admin console	OVERDUE	John Jackson
BACKLOG	Task	GI-74	Medium	Verify connectivity from test and QA servers to test server and admin console		Julie Williams
BACKLOG	Task	GI-75	Medium	Design a relatively simple business system for the test environments	OVERDUE	Eric Jones
BACKLOG	Task	GI-79	Medium	Database backup and maintenance to be scheduled to run weekly		John Smith
BACKLOG	Improvement	GI-80	Medium	LDAP integration should be configurable from the admin console		Amanda Brown
BACKLOG	Bug	GI-81	Medium	The health monitor does not log correctly all the event sources		George Walker

High-Level Status	Issue Type	Key	Priority	Summary	Warnings	Assignee
BACKLOG	Bug	GI-82	Medium	Addition and deletion of entity IDs does not work when triggered from the console machines		George Walker
BACKLOG	Bug	GI-83	Medium	Server configuration is not loaded on client environment		John Jackson
DELIVERED	Task	GI-85	Lowest	Define acceptance criteria for the serialization engine		John Smith
DELIVERED	Task	GI-86	Medium	Draft requirements document for MTP phase		John Smith
WIP	Bug	GI-91	Medium	Health monitor does not match the reference environment		Chris Davies
BACKLOG	Bug	GI-92	Medium	Tasks and URLs are not associated correctly with object types		Chris Davies
BACKLOG	Task	GI-94	High	Create operator training information kit		Chris Davies
BACKLOG	Task	GI-95	Medium	Implement distributed data feeds on client environment		George Walker
